Claims 1-5 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The recitation "extending parallel outwards" is confusing; parallel seems to imply that the wing portions extend parallel to the support members, but "outward" seems to imply that they extend outwardly at an angle as disclosed. Please clarify the wording of the claims to reflect the disclosed invention.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1 and 2 are rejected under 35 U.S.C. 102(b) as being anticipated by Wendt.

Note mounting block 310 shown in Fig. 2, which corresponds to the claimed "base", side walls 320, 330 which read on the claimed "two support members", and note any of fins 322 readable on the claimed "wing portions". Note finally the recession formed in the base portion opposite the side on which the walls are located, defined by two ridges or protrusions. This portion defines a relatively thin area (along with the corresponding recessed portion on the other side).

Claims 3-5 are allowed.

Application/Control Number: 10/717,588 Page 3

Art Unit: 3753

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

The remaining references of record show various heat sink designs, either with or without heat pipes.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Allen J. Flanigan whose telephone number is (571) 272-4910. The examiner can normally be reached on M-F 9:00-5:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Gene Mancene can be reached on (571) 272-4930. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
